

Estimating Your Insurance Coverage

What Should You Expect On Your Initial Visit?

An initial visit is not like a normal visit. We'll be taking a complete series of films for the first time, completing a comprehensive exam, a separate oral cancer screening, and a periodontal assessment. Hopefully your gums will be healthy enough that we can clean your teeth today.

I Have Dental Insurance; Will All Of This Be Covered?

We hope so! Your dental benefits are between you and the insurance company, and we are not privileged to that information. We will do our best to estimate your coverage.

What If My Insurance Doesn't Pay?

We try to estimate the best that we can. Your portion is the deductible and/or co-pay, which is due today. If you have a financial challenge with this or are not prepared, we can spread out payments for you.

In order to maximize your insurance benefits, please answer the following questions. This is very important in helping us determine your coverage, as you would be responsible for anything not covered:

1. Have you ever used your dental insurance before? _____ yes _____ no
2. Have you used any dental insurance benefits this year? _____ yes _____ no
3. Do you know if you are eligible to receive your dental benefits at the present time? _____ yes _____ no

I have read the above and understand that I am ultimately responsible for anything my insurance does not pay.
